PROFILE

DevOps and SRE professional with over one year of experience in hands-on experience in designing CI/CD pipelines, managing Kubernetes clusters on Azure, automating cloud infrastructure, and ensuring system reliability, performance, and security. Strong focus on automation, observability, and scalable architecture.

TECHNICAL SKILLS

Containerization, Container Orchestration Docker, Kubernetes, Helm	CI/CD Jenkins, Azure Devops	Cloud Platforms AWS, Azure	Scripting and Automation, DB Python, Bash
Monitoring and Logging Prometheus, Grafana	Configuration Management Ansible	Programming Python, django	Virtualization VMware, Hyper-V, EXSI
Networking, OS Administration Linux Administration I II, Windows Server, CCNA	Version Control Git & Github	Infrastructure Automation Terraform	GitOps ArgoCD

EXPERIENCE

DevOps & (SRE) at SalamDev - Designed and implemented scalable CI/CD pipelines using Azure DevOps, improving build reliability and reducing deployment times. - Deployed microservices-based applications to Azure Kubernetes Service (AKS) using Docker, Helm, and ArgoCD, following GitOps principles. - Automated infrastructure provisioning on Azure with Terraform, setting up AKS clusters, Azure Container Registry (ACR), networking, and role assignments. - Monitored system health and performance using Prometheus, Grafana, and the ELK stack (Elasticsearch, Kibana). - Supported mobile CI/CD workflows (Firebase, Apple, Android) and collaborated with mobile teams for synchronized deployments.	Jan 2025 – Current montrial, Canada
--	--

EDUCATION & INTERSHIPS

Bachelor of Computer and Information Sciences , Minia University Grade: Good Graduation project: "Designing Build and Developing full infrastructure IT system to enhance and improve the functionality and performance for restaurant has 7 branches"	Sep 2019 – Jun 2023
DevOps and Automation (NTI) — 4 Months - Designed, implemented, and maintained CI/CD pipelines. - Automated cloud infrastructure provisioning and management on AWS using Terraform, reducing manual work by 50%. - Used Kubernetes and Crossplane for container orchestration, improving scalability and reliability.	
DevOps Trainee (DEPI) — 6 Months - Gained hands-on experience in automating and optimizing software development processes. - Collaborated with development and operations teams to streamline workflows and improve deployment speed and system reliability.	

SIDE PROJECTS

Infrastructure Automation and CI/CD Pipeline Implementation (GitHub)

- Designed and deployed a scalable cloud infrastructure using **Terraform, Ansible, Kubernetes, and Jenkins**. Automated infrastructure provisioning with Terraform and managed configuration using Ansible. Deployed a containerized web application on **AWS EKS** and configured **Kubernetes LoadBalancer services**. Integrated a **CI/CD pipeline** with Jenkins and GitHub for seamless code deployment, utilizing **Docker** for containerization.

End-to-End DevOps Automation on AWS Ecosystem (GitHub)

- Designed and implemented a scalable **CI/CD pipeline** using **Jenkins, Docker, and Kubernetes** on **AWS**. Automated infrastructure provisioning with **Terraform** and **Ansible**, deploying microservices to Amazon **EKS**. Ensured security and efficiency with AWS services like ECR, Secrets Manager, and CloudWatch.

CERTIFICATES

KodeKloud DevOps Path

- Completed hands-on labs and projects covering Terraform, Kubernetes, CI/CD, and cloud automation.

CCNA

- Enterprise Networking, Security, and Automation
